### SHED FOR EXTRA INCOME

(Experimental Farm Notes)

There are few farms on the prairie where sheep with reasonable attention would not prove a definite asset to the farm income. Particularly in the wheat farming areas, farmers are in need of such side lines to provide extra returns most urgently needed in unfavorable crop years. Some additional fencing is required, but a few sheep can be raised in small fields near the buildings, until the profits will pay for more fencing.

Sheep will adapt themselves to varied conditions and require only an open shed in winter. They utilize low grade roughage in winter and from one to two pounds of whole grain per head daily will keep them in good condition. In summer they eat many of the common weeds and if necessary, can live on tender pasture than most other kinds of livestock.

Each lamb is usually worth more on the market in the fall than its mother and it is not unusual to get a sufficient number of twins to average 15 lambs for each ten ewes. In addition to the sale of lambs, the wool clip will pay for a good portion of the feed required. The wool clip at the Dominion Experimental Station, Scott, for 1931 averaged nine pounds from Shropshire and 13 1/2 pounds from Merino. The wool was shipped to the co-operative Wool Growers and has not been sold (September 16), but when desired a cash advance may be obtained at the time of shipment. The April lambs, were sorted in August and the larger individuals were sold at \$4.10 per hundred after freight was deducted, which was more than double the price of good cattle at the time. An important consideration in regard to the return from sheep is that the wool returns are available in June when cash is often scarce on the farm, and the early lambs may be sold before harvest when money is needed for the purchase of twins.

Grade ewes are quite suitable for (Continued on page four)

To sour stains off pans and kettles use a large cork or raw potato cut in half. Dip the cork or potato into your scouring cleanser and rub.

### WHEAT NUMBER—?

This guy who did the threshing said "would go a Number 1. But this I rather doubted as it slowly down did run. Then the neighbour round did gather, as you know they love to do, And the old man in the corner in chorus: "It's a darned good Number 2." On the way I met the banker, waitin' hopefully for me. And after meditation he pronounced it Number 3: So getting quite impatient I departed on the run, And by sneaking past some other guy, the elevator won!

There the buyer looked it over, put a hand in his cheek, Spoke a few words in the driveway and to me did kindly speak: "It's a Four, of that I'm certain, better ship it right away. For I wouldn't have to buy it, as the market's down today."

East or to the West, To Timbuctoo or Ballyhoo, where e'er it seemed best; Then I sat me down in patience to wait that joyful day When all my earnest labors I'd receive a little pay.

Soon there came a tiny missive by the early morning mail. And I staggered in my anger ere I lay down to wall—

Sure that grader was a creature who could use a farmer rough, For in his utter blindness, he did make it Five and Tough. Wrathful at the fierce injustice, roared I, pawed my Sunday topcoat to provide the cost of same. Came the answer in a fortnight, raising heck within my camp For I fainted when I read it: "Re-inspection—Six and Damp."

—T. Longbottom, in Bassano Mall

To prevent a thick coating of lime on the inside of your tea kettle, drop marble the kind the urchins play with on the streets—into the kettle, and the lime scale will adhere to the marble rather than the sides of the kettle.

### DESOLATION

My harp is crushed  
'Neath the wheels of Greed;  
My Garden of Hope  
Is choked with Weed.  
I cannot sing  
Tho' the stars invite—  
The suns are golden  
I see no light.

To the Plunderer's thirst,  
I have paid and paid  
Yet the Plunderer's thirst  
Is unslaked.

Work of my hands  
And Dream of my brain—  
All are but dust  
'Neath Mammon's train.  
Shelter I've builded,  
Fields I've tilled,  
Fields I've scattered  
Like sunlight spilled—  
All are crushed  
And swept away  
And the Plunderer still  
Cries: "Pay! Pay! Pay!"

### Personnel of Alberta's Live Stock Marketing Board Announced

EDMONTON, Nov. 19—Personnel of Alberta's first live stock marketing board under the Natural Products Marketing Act was announced Saturday afternoon by F. S. Gridale, Minister of Agriculture.

The board, consisting of 15 members was named by the minister at the request of representatives of the live stock industry in general meeting at Calgary, November 8, following the endorsing of a live stock marketing plan for the province.

The marketing plan has been submitted to the Federal Marketing Board at Ottawa, and when it is approved by this body, will be submitted to the Canadian Council, and finally endorsed by vote of Alberta live stock producers. It will be the responsibility of the board now named to determine within the provisions of the scheme, the procedure to be followed in this province in the marketing of live stock, and to coordinate the marketing machinery.

Work of the board will be to marketing scheme and submitting it to the live stock industry for approval was undertaken by a provisional live stock marketing committee of 17 members. Several of these members have been renamed to the board by the minister.

In making his announcement on Saturday, however, Mr. Gridale stated that in naming the board it had been found necessary to give the personnel of the provisional committee a chance

in order that the various areas of the province and the many branches of the industry be as fully as possible represented.

It is understood that in the forwarding of the work until such time as an order-in-council is signed declaring the marketing scheme effective, the newly named board and the provisional committee will work in conjunction.

At the conclusion of the first year of operation of the Alberta marketing plan the provincial board will be elected by direct vote of the livestock produc-

ers.

The 15 members of the Alberta Live Stock Marketing Board, names and the Minister, are: R. P. Gilchrist, Wild Horse; George Ross Kilda; W. C. McKenzie, Lethbridge; Stephen Lunn, Pincher Creek; George Miller Taber; Fulton Thomson, High River; Charles McKinnon, Dalmead; Howard P. Wright, Airdrie; H. L. Taggart, Olds; Fred McDonald, Mirror; C. R. Abbott, Lacome; T. R. Murray, Tofield; Geo. R. Ball, Edmonton; H. R. Bottiller, Soda Lake, and Alex Craig, Wembly.

### MARKET FOR LOW GRADE WHEAT

Nearly a million bushels of Canadian wheat were shipped down Dufferin and Superior last week. Most of this was Amber Durum but large quantities of low grade wheat are also going into the States for feeding purposes, in fact quite a premium exists at Port Williams for low grade compared with Vancouver due to the demand from the United States. The lower grades of Canadian wheat are now in a position which makes them competitive with Argentine wheat, but so far little overseas demand has arisen. The lower wheat grades are now at a price which also competes as substitute for feeding grains. The United States has reduced the duty on imports of wheat until for human consumption to a basic of 10% ad valorem or approximately 60¢ per bushel as compared to the duty of 42 cents per bushel. No. 6 wheat and feed wheat are considered unfit for milling and can thus be imported into U.S.A. at the reduced duty.

—T. Longbottom, in Bassano Mall

Mr. and Mrs. E. B. Allen of Heathdale, entertained a number of their friends to dinner and cards on Friday evening.

Myrtle School is holding a Xmas Concert on Friday afternoon Dec. 21st.

A C. G. I. T. meeting under the leadership of Miss Elliott will be held at Langford (Clarkston School) on Saturday, Dec. 1st. All girls from surrounding districts are invited.

Miss Duff and A. Hodge were guests at the H. E. Robinson home, at Rearville, on Sunday.

Ethan Hagey who has been at Mr. Jacobson's while they were absent on a trip to Alberta, returned home this week.

The Hanna Creamery will buy dressed poultry and turkeys in Chinook, on Dec. 11th.

## The Trend of Population and Power

"Go West, Young Man." Such was the advice tendered by a great American to the youth of the United States back in the last century. It was based, probably, upon a knowledge of the vast resources and wealth of opportunities of that then largely unsettled area. It may also have resulted from a study of the movements of people throughout the ages of the past, pointing to the historical fact that "westward the course of empire takes its way." At all events it is interesting to note that, for some reason or other, the movement of this world's population is largely from the east to the west.

In the dim dark ages of the past, Europe was settled by the migrations of people from Asia; Christopher Columbus and the other intrepid navigators who followed him made the way for the great movement of people across the Atlantic from the countries of the old world to the new western world of the Americas; and on this continent the trek of people has constituted a steady stream from east to west. We speak of Japan as in the Far East, but even there the advice and slogan to-day is "Go West, Young Man," and the old Japanese protectorate being carved out of Manchuria on the mainland of Asia.

In Canada we are, of necessity, profoundly interested in this trend of population to the west. This has had a tremendous effect upon national and economic policies in this Dominion, and it is certain to have an even greater influence. Moreover, it is not without its significance and value that this movement of population in Canada parallels the similar movement which has occurred and is still continuing to the south of the international boundary line of the 49th parallel.

The extent and rapidity of this western movement of population is reflected in a recent article in the Canadian Geographical Journal under the title "The Centre of Population." Most western data has been gathered by the census taken every ten years. As recently as forty years ago (1891), only 7.2% of the population of Canada was to be found in the four Western Provinces; but that percentage has risen by progressive steps until at the last census taking, (1931), 29.5% of Canada's population resided west of the Great Lakes.

At the time of Confederation, the centre of population in Canada was near the city of Montreal; at the time of the last census in 1931 the centre of population had moved westward nearly 450 miles and was found to be located near the city of St. Paul and practically 300 miles of this westward travel had taken place since the beginning of the present boundary.

Not only is the centre of population moving westward, but it is also moving northward. This is accounted for by two major factors—the opening of the vast mineral regions of the pre-Cambrian area, and the fact that the interior Province lies at higher latitudes.

The movement of centre of population steadily westward is as already stated, having a pronounced effect upon the political and economic life of Canada. Under our constitution, representation in the Parliament of Canada is based upon population; consequently the determining influence of national policies is steadily shifting westward, and the voice of the West is growing louder. Today, practically one-third of Canada's population resides west of the Great Lakes. If the same trend of population westward continues, albeit not quite so marked as since the last census taking, (1931), 29.5% of Canada's population will be in the West, and we may all that such an equilibrium divided by the national policies of the country.

Coincident with this shift of the centre of population, and as the wise moves westward. In 1890, the centre of manufacturing activity lies west of Kitchener and Penbrroke in Ontario; now, forty years later, it is located midway between Kitchener and St. Paul. St. Paul, and is, therefore, only about 60 miles behind that of population, whereas in the United States, the centre of manufactures is nearly 180 miles behind that of population in its westward movement.

With the opening up of the northern mineral areas of Manitoba, Saskatchewan and Alberta, the greater proportion of being the next major development in the West as it was in Ontario in the last few years, and with the development of the Churchill-Istudson Bay route, still to come, will take place in the economic relationship as between east and west and further impetus given to the western movement.

Such developments are bound to have a marked effect upon both the political and economic life of this country. It is true that as the centre of population and of manufacturing moves west the centre of the east increases, and it is to be expected, therefore, that the westward movement of those centres will not be as rapid as in the years of heavy immigration and westward setting of the prairie areas. But the northern development of the western half of the Dominion will assist in maintaining the western movement. The advice and slogan to youth to-day is not merely "Go West," but also "Go North."

### Queen Is Puzzle Fan

Britons have learned their Queen is a jig-saw puzzle fan. Queen Mary with the Princess Royal, the Countess of Harewood, visited the fair at the Imperial Institute where handiwork of disabled veterans is displayed and spent several minutes at one booth playing with a jig-saw puzzle. She then bought it.

### Job For Someone

Anyone with experience in running railroad cars or ice cream sundries might find a job in Poland where identifications are needed for 42,000 farming communities. The names, once chosen, will be permanent. Five years ago 142,000 of these projects sprung up and about two-thirds of them were named. It is for the others the government now seeks names.

### Rubber From Flowers

Herman E. Pitman, chemist of St. Louis, is seeking to obtain patent protection for a formula by which he claims 60 per cent. of the rubber requirements of the United States may be extracted from a species of the poinsettia. The plant, common as a decoration at Christmas time, thrives in southern states.

Approximately 11,800,000 words are spoken by the average man every year.

### United States Sends Protest

#### Complains To Persia Regarding Treatment Of Aviators

The United States has formally protested to Persia against the reported discourtesy shown there recently to two United States entrants in the England-Australia air race.

In a note that made no pretence of friendliness, the treatment accorded John H. Wright and John Polando when they made a forced landing, Oct. 23, between Moshamrah and Abadan because of minor engine trouble, the United States said it was "at a loss to understand" the action of the Persian authorities.

Although granted Persian permission to fly across that country and land there if necessary, Wright and Polando were detained 24 hours and subsequently withdrew from the race at Karachi, India.

### Squirrel Fights Hawk

#### Seeds In Killing Bird After Duel In Air

A duel to the death in mid-air between a hawk and a squirrel is reported by an amateur naturalist in Schweinitz, Silesia. On the border of a forest near the town, he saw a hawk fluttering in clumsy circles close to the ground, with a small animal wriggling in its talons. Finally both plunged to earth. A moment later the observer saw a squirrel, bleeding from many wounds, drag itself free and scramble up a nearby pine tree. The hawk lay dead, with blood pouring from a wound in its throat.

The coroner agreed with a suggestion that all cars involved in fatal accidents should immediately be impounded by police pending an examination of the brakes and other equipment.

### Would Amend Criminal Code

#### St. John Coroner Recommends New Law For Motorists Who Kill

"I am forced to the conclusion that one of our greatest needs is to modernize our criminal code," Dr. C. L. Emerson, Saint John city and county coroner, said in a letter published at Saint John, N.B. Pointing out the difficulty of obtaining convictions under the existing law in cases of death due to automobile accidents, he suggested a new law less severe than that covering manslaughter, but sufficiently severe to prove a deterrent to those motorists inclined to disregard public safety.

"There are only two charges that may be laid against an individual causing death, namely, murder and manslaughter," wrote Dr. Emerson. "This seems to me that manslaughter is so severe that it is virtually impossible to get a trial jury to convict."

"If the crime were classed not as manslaughter but as some lesser crime, with a correspondingly less severe punishment, yet sufficient to emphasize the gravity of the offense, I am of the opinion that more persons criminally responsible for the death of others in motor accidents would receive just punishment."

The coroner agreed with a suggestion that all cars involved in fatal accidents should immediately be impounded by police pending an examination of the brakes and other equipment.

### Simpler And Best Way

#### England Is Using Surplus Milk To Feed Children

"The simplest and best way of getting rid of a surplus of milk is to get that surplus drunk. We don't want to turn it into buttons or staples for the back of our necks," said Walther Elliot, Minister for Agriculture, when he spoke to a meeting of Unionist teachers in Glasgow. Speaking of his recently launched scheme to give a child milk at school each day, Mr. Elliot hinted that it would be introduced to Scotland in the near future. "No doubt," he said, "proposals will be worked out before very long in Scotland. We have at present in England 1,000,000 children getting milk every day, and we have set ourselves if possible, to raise that figure to 3,000,000 by Easter of next year."

To take back the regular package unopened.

But millions of people testify as to Kruschen's effectiveness for in 1930 Dr. Kruschen's efforts for a free trial of Kruschen's for a period of 10 days resulted in 100,000 new users. Now it has been found that gives the same results as Kruschen. Get your package without delay. The supply of Free Trial bottles which contains a regular bottle and a FREE Trial Bottle. After using the Trial bottle, continue with the Regular bottle—until you are satisfied with the results. If you are not satisfied, stop using it and go back to your old product.

Two Hundred White Leghorns Shipped To Poultry Farm In France

Fifty white Leghorns cockerels and 150 pullets purchased from R.O.P. breeders in Western Ontario by L'Abbe J. Desnoyer, of Villeneuve-En-Beaujolais, France, were shipped from Montreal direct to France, per the S. S. Lister, on November 15th. This consignment of white Leghorns will be used for breeding purposes with the large poultry farm managed by L'Abbe Desnoyer in France.

He came to Eastern Canada primarily to acquaint himself with the methods of poultry raising and the quality of the stock in this country and he was much impressed.

The recent sale is a result of contacts made by officers of the Dominion Department of Agriculture at the World's Poultry Congress in London and Rome.

### Three Sugars In Honey

Levulose (fruit sugar), one of the three sugars found in honey, is non-granulating and is usually the predominate one. The other two sugars are dextrose (grape sugar) and sucrose (cane sugar). Dextrose is a rapid granulating sugar. Sucrose is present in honey only in very small quantities.

There is a heavy public demand for information from the Dominion Entomological Branch on such subjects as improved sprays for household insects, moth-proofing chemicals and cleaning appliances, notably vacuum cleaners, in eliminating and controlling clothes moths and carpet beetles.

### Sure Signs

of kidney troubles are pain in the back, difficult urination, kidney trouble, by going suddenly and causing pain in the kidney, and cause of trouble to your liver.

What you need is the following: 1. Sarsaparilla, 2. Camphorated Pills. Purify kidneys, 3. Kidney and Bladder.

Take them in the morning and night.

Discovery Is Interesting

Old Indian Medicine Stand Found Near Kingston, Ontario

Announcement was made by W. Havelock Robb, of Abbey Dawn sanctuary near Kingston, Ontario, of an interesting archaeological discovery in the finding on his property of a big medicine stone, a sacred or ceremonial Indian medicine and corn mill, unique among such relics of past North American people, complete with grinder.

It is of hard, red granite, yet ob-

viously shaped, in some strange manner, to a special design. The age of the stone is unknown, but it is believed to have been used by Indians

in Champlain's time.

## New Plan Helps Mothers Solve Problem of Colds

Mothers Adopt Plan by the Makers of Vicks Vapo-nol for Better Control of Colds in the Home.

### Introduced with the Remarkable New Aid in Preventing Colds—Vicks Vapo-nol

Every mother is burdened with the problem of colds—especially the frequent colds of children. It is good news to them, then, that the makers of Vicks Vapo-nol have come up with a plan for better control of colds in the home.

The helpfulness of Vicks Vapo-nol in reducing the number and duration of colds has been tested by thousands of mothers in every home by their use of the product.

**Trial Offer to Vicks Users**

Vicks Plan is introduced along with the new Vicks Vapo-nol, based on a new idea for preventing colds—**the modern method of treating colds.** It is a simple, safe, effective way to prevent colds. Use Vicks Vapo-nol—apply to nostrils. It penetrates the skin, so that the vapors pass through the skin, like a novocaine or plaster—and by inhalation of its medicated vapors direct to inflamed air-passages. This combination action loosens phlegm, soothes irritated membranes.

Together with the use of these two products, Vicks Plan contains certain ingredients which are for building resistance to colds. Have your family follow Vicks Plan and help them to greater freedom from colds. Full details of the Plan are in each Vicks package.

Here briefly, is how Vicks Plan works:

### To Help Prevent Many Colds

When children come in sniffling and sneezing, apply Vicks Vapo-nol up each nostril. Use Vicks Vapo-nol yourself at first scratchy, sneezy throat. Use Vicks Vapo-nol stimulates the functions Nature has provided—in the nose—to prevent colds, and to throw off colds in their early stages. It thus helps to avoid many colds.

### To Help Shorten a Cold

If a cold strikes without warning, or slips by every precaution (as some colds always will) depend on Vicks Vapo-nol. Just rubbed on throat and chest, it attacks the cold at its source. It penetrates the skin, so that the vapors pass through the skin, like a novocaine or plaster—and by inhalation of its medicated vapors direct to inflamed air-passages. This combination action loosens phlegm, soothes irritated membranes.

Together with the use of these two products, Vicks Plan contains certain ingredients which are for building resistance to colds. Have your family follow Vicks Plan and help them to greater freedom from colds. Full details of the Plan are in each Vicks package.

### Anti-Grasshopper Campaign

#### Estimate Of Wheat Saved In Western Provinces Is 25,383,000 Bushels

The anti-grasshopper campaigns saved \$17,763,000 for farmers of all three prairie provinces, according to a Seare Grala Company report. The estimate of wheat saved for Alberta, Saskatchewan and Manitoba was 25,383,000 bushels.

Unofficial information gives the cost of fighting the grasshopper pest in all three provinces as considerably less than \$1,000,000.

Alberta's campaign accomplished the most saving of the three provinces: 11,339,000 bushels or 18.11 per cent. of the harvest.

Saskatchewan saved 6,932,000 bushels or 21.59 per cent. of the harvest.

In Manitoba, 4,412,000 bushels were saved on 15.09 per cent. of the harvest.

### Grasshopper infestation wreaked a loss of 14,343,000 bushels of wheat in Alberta; 3,997,000 bushels; in Saskatchewan; 6,344,000 bushels, and in Manitoba, 4,002,000 bushels.

### New Aid To Sailors

#### Device Measures Depth Of Shallow Water By Sound

A sound so shrill that it cannot be heard, which measures the depth of shallow water almost as accurately as a foot rule, is science's newest aid to sailors and navigators, announced by the U.S. Coast and Geodetic Survey.

The new device called the "shallow bathometer" is expected to be an important aid to ships navigating in shoal water and making charts of the bottom in shallow-water areas.

More than \$125,000,000 has been raised by "flag" collection days in Britain in the last twenty years.

In 1938, a waterproof 5,104' foot high was seen off New South Wales.

### Device To Save Lives

#### Water By Sound

# EDWARDSBURG CROWN BRAND CORN SYRUP

A pure, wholesome, and economical table Syrup. Children love its delicious flavor.

THE CANADA STARCH CO. LIMITED, MONTREAL.

## THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Colorado Trail", "The Canyon Trail", Etc.

### SYNOPSIS

"You've fallen near to a half-share in plenty of trouble," the lawyer told Gerald Keene, "the Broken Spur has been evidently trying to buy the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go see what was happening for himself—not as George King, the owner of the Hour-glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward wildwest outfit.

Don King, despatch and lackeys provided, was returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grub-snatched him of his discovery of a new oil field. The oil is the life of the ore. He sees Broken Spur men rustling Hour-glass cattle and profits against it.

Spike Goddard and Sam Dugan, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the oil field.

Gerald Keene, dressed in a ridiculous cowboy costume, arrives at the Hour-glass ranch and is hired as a cowboy by Joe Carr. The impersonation of a tenderfoot is successful, and he is accepted much by the other occupants of the bunkhouse.

(Now Go On With The Story)

### CHAPTER V.—Continued

"Dustin! That damned crook! I wouldn't let him take care of a three-legged burro that I liked. He's been at the bottom of all our troubles."

"Yeah. I know that but we can't prove it. And that's what counts. Who's this new hand you took on, Joe?"

His hand swept toward the bunkhouse, where Stone stood talking to Lee and Worth, both of whom were laughing.

"Just a new man I picked up today. He came in and asked for a job. We got to have a new man and he's got to be cheap, so I hired him. He can ride fence. He's just a crazy fool who says he wants to learn the cattle business. He told me so when I hired him. He said he wanted to learn it from the ground up. We've got right down to the ground now on the Hour-glass," he said grimly. "It's startin' good. Set him to work in the mornin' ridin' fence on the west line. Did you see his outfit?"

"Din't I? I wish I looked like that when I was his age. I'd sure have filled the eye of some good-lookin' girl. Don't borrow troubles, Joe. I'll come fum enough. Give me a share of that drink."

Carri poured him a generous half-pint and shuffled the papers on his desk.

"I had no more cares than that new hand," he growled. "I'd get drunk for a week. He ain't a bad lookin' kid. Pity he's such a damned fool. Anybody's a damned fool who tries to make money off cattle unless he's crooked at the start. Duro Stone! That's sure one hell of a name."

## OLD PEOPLE FEEL YOUNG

Just because more years than you care to count have fled by on your life's calendar is no reason for feeling old. Age is often a gain, not a loss.

It is a matter of health. Stay vigorous and you stay young.

But how, you ask? Do it the way thousands of people do—drinking Wincums.

Wincums is a delicious wine, free from drugs, that brings all the valuable elements of grapes and wine with the highest quality of beef and guaranteed malt extract. Its invigorating effect is almost magical—yet perfectly natural.

The valuable elements in Wincums give your ageing system exactly the stimulating nourishment it requires. They soothe your nerves, energize your blood, and flood your whole body with moist youthful buoyancy and vigor.

More than 20,000 medical men have heartily endorsed Wincums in a formal testimonial. It will make you feel young again by creating for you new stores of strength and energy. Get Wincums from your druggist—Salem, Harold F. Steele & Co., Ltd., Toronto.

30

a refreshing ingenuity about this new hand that amused her. But why under Heaven should any man take up such a life? If her father, who had been a cattleman for more than fifty years, could not succeed, how could an amateur like this man Stone look for success? She felt vaguely sorry for him.

"How'd you make out in the bunkhouse last night?" she asked. "Some time Balines thinks he's a qualified practical joker."

"I put some sand-spurs inside my shirt," said Stone. "But he was right pleasant about talkin' 'em out after I rubbed his nose in 'em."

She laughed a little and to her own astonishment found herself flushing warmly under his eyes.

"I wouldn't let my horse eat all those fox-tails," she said in desperation. "They'll make his mouth sore."

"Look! There's a cow over there. . . . The first I've seen to-day."

A big dun cow thrust through the heavy brush followed closely by a bawling calf that struggled for its natural rights. They watched the cow as she flung into the pool with the calf banging at her flanks, and Edith's face suddenly hardened.

"Look at that cow," she said quickly. "That's one of our Hour-glass cows. . . . Now look at the calf. . . ."

"Well. . . . Stone looked the calf over leisurely.

"If you're sending him"—she nodded at Stone—"out to ride fence, I'll show you on the map. . . ."

Crewe, meeting him at the kitchen, gave him his orders briefly.

"You'll ride fence on the West line. If any posts are down, put 'em up an' resting the wire. Know how to?"

"Sure. Like fencin' a hog-pasture. I suppose the line is marked."

"I'll show you on the map. . . ."

Crewe led the way to the office but was stopped by Edith. She was in riding dress and she was eating a hasty sandwich.

"If you're sending him"—she nodded at Stone—"out to ride fence, I'll show you on the map. . . ."

Crewe led the way to the office but was stopped by Edith. She was in riding dress and she was eating a hasty sandwich.

"Come to think of it, I believe I have," she said slowly. "But. . . ."

"Look. . . . The cow's a Broken Spur cow, too. . . . There on her hind shoulder. . . ."

Stone followed her out to the corral where his pony stood saddled, and Lee brought Edith's horse from the stable. Two minutes later they plodded their way across the East pasture with its two thousand acres toward the West line.

That West line ran for miles straight North over a yellowing grass mesa. There were many breaks in the wire that there had been no men, or few, to repair and many posts were down. From time to time Stone dismounted, whistling, reset his posts, stabled his wire and made the ends fast, and Edith watched every move he made.

Mid after mile that they rode was checked off in red letters in the diary of his life. He had seen many women but never one like this. Her eyes were alight with the Wind of the West. . . . And there is no wine fermented by mere man that is like it. . . . Her lips were really parted and her cheeks were aglow with a light that has never been seen by those whose eyes are opened by the gods. She gave to every motion of her horse and rode, a perfect poem, across that sunlit mesa under Duro Stone's adoring eyes. He had never believed that such a woman lived west of the Pillars of Hercules. Himself, fairly well read in the classics, he repeated these lines that Marlowe wrote:

"The face that launched a thousand ships And burned the topless towers of Ilium."

Then he turned to her. . . . Helen. . . . Edith. . . . He did not care at all about the name. That was quite incidental. But he never got a chance to say what was on his mind.

Far below them, below the slope of the hill, a pool of quiet dark water showed like pruned-colored silk under four great cotton-wood trees and a few cattle stood far off on the slope of the hill.

"Look there. . . . Edith pointed to the great sweep of the land before them. "You've been with us only a few hours but you must have heard the trouble that we are having. . . ."

He nodded. His gaze seemed to center on his horse's ears but he was always conscious of the golden voice. . . . It's just hard luck," she said.

"Hard luck and our own mismanagement. . . ."

"Thank God," he thought. "Here is one person enough to realize that Fate doesn't sit up at nights to deal us bad hands. She gives us brains to be used. . . . Aloud he said:

"It's a good land but she sure doesn't show much cow-life."

"Let's eat our sandwiches here," she suggested as they ponies halted through the brush toward the water, where the springs of those troublesome Soda Springs caught the sunlight. She slipped the bit from her horse's mouth and watched him thrust his muzzle deep in the pool. Then she smiled at Stone, who had dismounted on the "off" side and stood awkwardly watching her.

"You're entirely new to range work, aren't you?" She pointed accusingly to his unsaddled pony. "We don't, as a rule, unsaddle at work. Might need the pony quickly. It's just a yank. You understand?"

"Oh, yes, and thank you. I'll need a lot of hints. I thought the horse'd like to rest. It seemed tired. . . ."

"For Heaven's sake don't call your horse 'it.' She glared at him. Then she smiled at him again. There was

## THE RHYMING OPTIMIST

By Aline Michaelis

### NIGHT'S FREEDOM

At night with my windows open To the wide sky's star-set and the room behind me silent And Earth's footstep distant march.

I am free with a splendid freedom While in day I cannot boast, With the deepening shadows about me and the starry host.

I am free with a soaring freedom For the quest I must desire Down ways of hopes and dreams To bring me joy and promise To bring me joy and promise When I fling my windows open To starlight and thoughts of you!

—Leaves Money To College

Christian Smith, the German tailor who had pressed the clothes of Dartmouth College students for the past ten years, left his life's savings of \$5,000 to the faculty of the college, the probate of his will disclosed.

To a son and daughter he had not seen since the Great War he left \$1 each.

—Penalty That Fits

There is only one adequate punishment for persons who at the wheel of an automobile continuously imperil life and limb of other citizens and that is to deprive them of their driver's license for six months or a year, according to the gravity of their crime," says the Calgary Herald.

—A Strange Custom

One of the oldest races in the world and one of the strangest is the 400-year-old Palio race held annually at Siena, Tuscany. Before each race the horses entered are led to the church altar complete in silk and velvet trappings and holy water is sprinkled on their heads by the priest.

—According to the latest statistics,

## MATURITY—MATERNITY MIDDLE AGE

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

At these three critical periods a woman needs a medicine she can depend on. That's why we are glad to offer Lydia E. Pinkham's Vegetable Compound, 96 out of 100 say, "It helps me! Let it help you, too.

For Heaven's sake don't call your horse 'it.' She glared at him. Then she smiled at him again. There was

## Many Similar Cases

DETROIT LADIES DESTITUTE THROUGH NO FAULT OF THEIR OWN

The financial trials of the world are scattered with the wrecks of investment programmes. In each of them is a poignant personal tragedy.

The other day, four old ladies applied for old age pensions from the State of Michigan. Their ages ranged from 74 to 82. They are the daughters of one of Detroit's early and wealthy citizens—a man who was so well-to-do and so public-spirited that he donated to the city of Detroit the site on which the City Hall now stands. The property this family once owned is to-day valued at \$80,000, but the four daughters are practically penniless.

Here is presented the perfect opportunity to draw the moral of the value of thrift and investment. But when one looks into the circumstances one finds that the moral is sheer irony applied to this case. One of the daughters had newspaper reporters the other day:

"I don't believe we are to blame because we are destitute at our ages. Now take my own case, for example. I saved my money against old age. I was advised to buy bonds and so I bought them, real estate, bonds through a Detroit bank. They are worth nothing now. I can't collect a penny."

This happened in Detroit, but the same thing has happened all over Canada. What an argument it is for the strengthening of companies legislation, the better regulation of security selling and the promotion of higher standards of competency and ethics in the investment business—Financial Post.

## THE GOOSE CAME HOME TO DIE

By JACK MINER

There is a seven foot fence that Mr. Henry Ford built around my 30-acre bird Sanctuary, which takes in our home.

As my home is private property the same as yours, we have the gate open to the public every day except Sundays when the birds are at their best which is from November 15th to December 15th, and from March 15th to April 15th, and yesterday while I was patrolling the north part of the sanctuary, Mrs. Miner came walking in. It came slowly down the drive and sat and laid down at the grade door of our home.

Three gentlemen were present including Mr. Andrew A. Gawley, the man with the steel hands from Meadow, Ontario, and they saw Mrs. Miner walk out and pick the goose up and try to care for it, but it died in about one hour.

Now there is never any shooting done within one mile of our home, not was there any shooting done within this distance yesterday, but this goose was freshly shot because the blood was dripping from its wounded side, and it came home and died at our door. We have no idea how far away this bird received its wound but we have proof that a few years ago one was shot over 7 miles away and came home and died beside our house.

## NOT European French

French-Canadian Habitual Is More Like the English

Racial background of the French-Canadian is an admixture of Teutonic, Breton and Celtic blood and in this respect he is more like the Englishman than the Old Country Frenchman. Professor W. M. White, professor of history at McGill University, stated: "The vivacity which was usually associated with the French character, was absent from the make-up of the French-Canadian habitant, the latter being rather a 'slow-moving person,'" Prof. White declared.

### Commemoration Medal

To Issue Medal in Connection With

25th Anniversary of The King's

Accession To the Throne

Arrangements have been made for the issue next year by the royal mint of a medal in commemoration of the 25th anniversary of the King's accession to the throne.

The medal will show on the obverse side specially drawn crowned effigies of their majesties with the inscription in Roman letters MCMX—MCMXXXV (1910-1935). The reverse side will bear a view of Windsor Castle as the principal house of the royal house of Windsor.

The medal will be issued in two sizes. The larger will be 2 1/4 inches in diameter struck in standard silver and available to the public at a cost of a guinea (approximately \$5) apiece. The smaller, struck in fine silver, will be 1 1/4 inches in diameter and will be obtainable for half a crown (approximately 60 cents).

Special arrangements for sale of the medal in the Dominions will be announced later.

### Most Modern Equipment

France Had Impressive Exhibit At

International Air Show

Modern equipment for countering aerial attacks was a feature of the French exhibit at the International Aeronautical show, which opened in Paris recently. France showed her preoccupation with the menace of invasion from the air by an impressive governmental exhibit of the latest advances in anti-aircraft war machinery. Prominence was given long range, rapid-firing cannons and extremely sensitive detectors which can "pick up" the approach of an enemy long before the hostile bomber or dirigible has come into view.

At Marylebone Court it was alleged that a tenant kept a gramophone, a sewing machine, a kettle-drum and a baby. Possibly this is an exaggeration. He may merely have been learning to play the bagpipes.

### CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place use a reliable, recent, and dentifrice-like article such as Dr. Wernet's Powder—the largest seller in the world—grasp teeth to keep them yet comfortable they feel natural.

Dr. Wernet's Powder gives a delightful comfort assured all day long.

Forms a special comfort cushion to protect teeth and gums. No colored, gaudy paste—keeps mouth sanitary—breath pleasant. Inexpensive—all druggists

## Heard Around Town

The Ladies' Card Club met last week at the home of Mr. and Mrs. S. Meeres. The honors were shared by Mrs. E. C. Pfeiffer and Mrs. W. S. Lee.

The Ladies' Card Club met Tuesday evening, November 27th, at the home of Mrs. Robinson, with Mrs. P Petersen as hostess. Three tables were played, honors going to Mrs. Robinson and Miss Kain. Miss Marjorie Lee will be the hostess next week.

The flooding of the curling rink started this week.

C. E. Neff, of Hanna, was a town business visitor on Thursday.

Doctor Kerr, of Oyen, shipped out a car load of cattle from this district last week.

Walter Gaugher was a week end visitor at Drumheller.

A. Rowland, of Alderside, was a week end visitor at the Todd home.

N. D. Stewart left Tuesday morning for Calgary where he will attend the U. F. A. Convention which is being held in that city this week.

Mrs. Rosenau'sr. has been quite ill for the past two weeks.

J. W. Shier left on Monday morning for Ontario where he will spend the winter months.

Born—To Mr. and Mrs. E. V. Elford in the Cereal hospital on Tuesday, Nov. 27th, a daughter.

Born—To Mr. and Mrs. Jack Rosenau, in the Cereal hospital, on Saturday November 24th, a daughter.

Harold Rosenau, son of August Rosenau, had the misfortune to be run over by car on Friday afternoon, while returning to his home from school. He was not as seriously injured as at first expected.

Don't forget the Three Act Play "Her Honor the Mayor" on Friday, Nov. 30th in the School Hall, at 8:30 p.m. A Dance will be held in the Chinook Hotel Hall, following the Play.

Lorne Proudfoot, M. L. A., returned home Sunday morning after having spent greater part of week at Sibbald and Acadia Valley & etc.

Ed. Stewart, of Naco' is visiting for a few days at the home of his mother, Mrs. Stewart sr.

W. S. Warren and R. B. Langley were in Calgary for a few days attending a meeting in connection with municipalities.

Mrs. Richard Stewart was a Calgary visitor over the week end, returning Tuesday morning.

Messrs. Tom and Charlie Mah who have been visiting in China for the past two years, returned to Chinook this week.

Smoky Wong who has been away for some time, returned this week.

Rates Reasonable

(Continued from page one) the production of market lambs and by use of a purebred ram of another line of breeding a larger lamb is obtained than results from straight breeding. This has been confirmed at the Scott Station as well as the fact that such crossbred lambs are not always satisfactory for breeding purposes but should be sold on the market and the ordinary ewes retained as long as their health and number remain satisfactory, after which they may be sold for mutton, and other young ewes purchased.—E. Van N. Dominion Experimental Station, Scott, Sask.

## EXERCISE

One needs to keep up exercise or the muscles will become weak and flabby and deteriorate. But the middle aged person who exercises too violently is in danger. One should begin very gradually with a daily program of exercise, if he has allowed himself to grow lazy and weak. It takes several weeks before he can equal exercise one who has kept in practice. Begin with a daily walk, then gradually work up to a "daily dozen".

If strenuous effort makes your heart beat on thumping for more than a few minutes, your heart muscle needs care and training. Give it a rest first and training very gradually, but do not neglect to tone up by mild training. Unless you are accustomed to exercise, a brisk walk is better than a lively run. But it is foolish to give up exercise because you are too weak and tired. Rather build yourself up until exercise is a pleasure. Then you will enjoy the vigor of life.

## MARKETING SCHEMES AND CONSUMERS' CO-OPERATION

The following extract from a summary of a speech by Mr. R. A. Johnson, Secretary of the Co-operative Union of Great Britain, which appeared in the "Co-operative News" indicates the reaction of some officials of the British Co-operative Movement to the various marketing schemes introduced by the National Government.

"The agricultural marketing schemes were the most serious menace to the co-operative movement at present. They were far more dangerous than the old type of subsidy, for they prevented stabilized trade in its present state in the existing capitalistic channels and prevented the co-operative movement from making normal expansions. Under the bacon marketing scheme it was because its right to import was held because it's right to import from its own factories in Denmark was limited by the quota, whilst its right to produce in this country was infinitesimal, based as it was on 1933 production. Other marketing schemes would be operated on similar lines to the bacon scheme, would give the privates a larger system, and a grip on the trade of the country. The sugar scheme gave a virtual monopoly to about a dozen firms in this country, whilst the milk marketing scheme showed no regard either for the interest of the consumer or of the worker."

Unless you are accustomed to exercise, a brisk walk is better than a lively run. But it is foolish to give up exercise because you are too weak and tired. Rather build yourself up until exercise is a pleasure. Then you will enjoy the vigor of life.

poor old But dyer, has made us rarer gifts than gold.  
These laid the earth away  
Poured out the red sweet wine of  
youth;  
Gave us the years to be of world and  
joy,  
And that unliped serene that men  
call age;  
And those that have been their sons;  
They gave - their immortality.

## THE ADVANCE WEATHER BULLETIN

Week of Nov. 25 to Dec. 2, 1934

Monday, Nov. 26—General Pacific coast, including parts of central provinces somewhat unsettled, but with mountains fairly warm and clear; temperatures slowly declining.

Tuesday, Nov. 27—Probably mild disturbance in southwest, though not much precipitation; most of country clear; mild temperatures, but turning colder.

Wednesday, Nov. 28—Clearing in west and northwest but somewhat unsettled in southwest, yet not much precipitation expected; and temperatures slowly declining.

Thursday, Nov. 29—Generally clear weather and warm temperatures, in southwest near great lakes and east rather unsettled but with very light precipitation.

Friday, Nov. 30—Nearly everywhere

## The Woman Reader

## HOUSEHOLD HINTS

Save your baking powder cans for making steamed brown bread and puddings. These may be set, half full of batter and covered into a kettle of boiling water to steam until done. Perforate the tops of the cans to let out the steam as the contents rise and cook. You may do this by driving a nail through them.

The other day I called on a family who needed to make every meal count and I found the children eating stoned pumpkin, with a spoon, from a glass. "Wise mother I thought. That pumpkin contains valuable food elements: starch, sugar, water, bulk, flavor, vitamins, mineral salts—and cost almost nothing.

We have become familiar with apple-sauce, cake, and the idea of adding fruits—apple, pineapple, cherries, etc.

FASHIONS, FADS FOIBLES

Hair fashions are elaborate—not long hair, but curly and caught high on the head, up away from the neck on the back. Hair may be tinted with vegetable rinses which give life and tone without the risks of old time hair dyes. A simpler arrangement about the face is best when the rest of the head is ornate.

Velvet gowns are running riot. They always look elegant and rich, but may be purchased now for a very low price.

New and a little ahead of the times are the sheer black hose worn on the head or ornate.

Bright colored satin collars and cuffs decorate the plain collarless dress and enable you to match other accessories.

One of the greatest labor, time and step savers, as well as being a saver on memory and mental exertion, is

the list of things. Keep in several convenient places a quantity of scratch paper and a pencil, and jot down things you want to do. Make a list of the things you want to buy. Make a list of the things you want to do the next time you make a trip upstairs. Place near the cellar door the things you want to remember to bring up. Make a list of the odd jobs you want to do when you can get around to them.

The shopping list, the grocery list and the calling list are familiar convenience. Make a list of the services you want to do, get a box, a button on Town's sweater, mend the rip in Mary's dress, put a patch on Dad's overalls, or what-not.

## KINDERSEY BUILDS NEW RINK

Kindersey is reported to be building a new closed rink, with full size hockey sheet in the centre and flanked by two sheets of curling ice. The new structure is being erected as part of a relief works program the Herald is informed, and a number of local railway men have expressed warm admiration for the spirit which has prompted this Kindersey enterprise and for the excellent type of rink being erected.
